

Healthcare on the Hill

December 5, 2006

~~~~~

Please join the Washington Policy Analysis and Healthcare Research teams  
December 5<sup>th</sup> at the Hyatt Regency Capitol Hill  
for our Healthcare on the Hill conference  
8:00 am until 4:00 pm

*Space is limited, so contact your FBR sales representative for further details.*

In the healthcare services arena, we will explore critical healthcare policy proposals related to directly negotiating pricing with drug companies, "filling in" the Part D donut hole, changing reimbursement levels to Medicare Advantage and private fee for service providers, and the future of the PPO stabilization fund. In addition, we expect to identify precarious healthcare segments—ranging from oxygen providers, durable medical equipment manufacturers, and specialty hospitals—subject to cuts in the lame duck budget negotiations.

On the drug and biotech side, we will assess the chances of drug reimportation legislation, determine the future efforts to address drug safety, regulate authorized generics, and the follow-on attachments to the PDUFA reauthorization.

Investors can expect to see representatives from CMS, the FDA, the White House, House Speaker Pelosi's office, congressional committee staffers, and various trade associations representing pharmaceuticals and biotechnology, managed care, hospitals, and the medical device industry.

## Featured Speakers
